MEXICAN PETROLEUM

WHY IT IS
A GREAT PEACE STOCK

C. W. BARRON SAYS IN HIS BOOK

The Mexican Problem

"No country in the world needs closer relations with the oil development of Mexico than the United States. The future demands not only redemption of the Mexican man of the soil, but the redemption of the American farmer as well."

"Agriculture is basal in the world's progress. All industries, in both peace and war, rest upon it. But the man with the hoe still indicts Christian civilization."

"He has no eight-hour day; he completes with women and children who put no price on their labor; his surplus products are dumped, almost as refuse, his milk to the milk contractor, his potatoes to the starch factory. He has no storage for apples when, in an abundant season, they are not worth the price of the barrel. Heaven's sun itself appears to compete with him. He has never been taught that there is only one wealth for the farmer, and that is large storage backed by broad acres, quickly cultivated by machinery. His great machine, the horse, for spring and fall ploughing, 'eats his head off' in an idle winter."

"His redemption cannot come through the parcel post or oil-smoothed roads for city motors, or by state and national agricultural bureaus."

"The redemption of 'the man with the hoe' will come through the gasoline motor that will plow spring and fall, cultivate all summer, chop wood in the winter, and not 'eat its head off'."

"The ambition of Henry Ford is a gasoline tractor within reach of the farmer. Success here would mean more for the world than all gasoline motor development to date."

"It would solve the labor problem on the farm; enable the individual farmer to hold broad acres, by quick cultivation and crops quickly stored. The result from such prosperity for the farmer would be great stores of food, steady prices for the world."

"The farm power, the food power, the sea power, the world power, cry out for gasoline and fuel oil. The Pennsylvania and Indiana oil fields are failing. California is exhausting pocket after pocket. The great oil area of the world-to-day stretches from Kansas to Tehuantepec. The lightest oil is at both these extreme points. The appearance is that the great central reservoirs are in the Mexican field."

"Their conservation is a world-wide necessity. Their protection is the duty of all nations."

In this book Mr. Barron also describes the great future for oil in the uses of the world
